

## **Certificates of Conformity**

### **Policy statement**

As stockists and distributors we purchase the vast majority of our major packaging and graphical boards from Quality Assured manufacturers who supply within published specifications and tolerances, unless otherwise agreed. Our own management systems, together with those of our suppliers, ensure that our products are fully traceable to source.

For practical administrative reasons, we do not request or issue individual certificates of conformity with every batch but on request, we can provide a Material Quality Statement, which is renewed annually.
