Re: RoHS Certification for Coated Paperboard Products
(EVEREST® Folding Carton Board; Riegelwood, North Carolina; Augusta, Georgia; and Texarkana, Texas mills)

Dear Mr. Ingall:

Please be advised that International Paper's EVEREST folding carton board products comply with European Union Directive 2002/95/EC on the restriction of hazardous substances in electrical and electronic equipment, or RoHS.

We use no lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBBs) or polybrominated diphenyl ethers (PBDEs) in the manufacture of EVEREST folding carton board, and none of these materials is added to the finished product.

Low levels of the listed heavy metals will be present because trees take them up from forest soils. Specifically, lead, cadmium, mercury, and chromium (total) are each present at less than three parts per million. Therefore, these products comply with the total heavy metals limit of 100 parts per million recommended by CONEG and required by EU Directive 94/62/EC and CEN standard CR13695-1. No PBB or PBDE will be in our EVEREST folding carton board as shipped or delivered.
