Declaration Bleaching at Korsnäs

All bleached kraft pulp used in the production of paper and board at Korsnäs AB is produced without using elemental chlorine.

Korsnäs production unit at Gävle uses elemental chlorine free (ECF) and Frövi uses total chlorine free (TCF) bleaching technology. Both sites live up to the definitions of Best Available Technique (BAT) according to EU's IPPC-Directive.

When produced with BAT, pulp bleached with both TCF and ECF technology meet modern standards regarding both quality and environmental aspects. The desired board properties can be reached with both ECF- and TCF-bleached pulps.
